

## Product Guide

- Nickel nitrate salt with a nickel concentration of 19.8%
- Nickel nitrate solution with a nickel concentration between 10.0% and 14.5%
- Nickel chloride salt with a nickel concentration of 24.3%
- Nickel chloride solution with a nickel concentration between 10.0% and 14.0%
- Nickel sulphate salt with a nickel concentration of 20.9%
- Nickel sulphate solution with a nickel concentration between 6.0% and 10.0%
- Nickel hydroxide carbonate is available as powder (44%-48%), as innovative “dust-less” powder (30%-48%), as humid powder (20%-24%) or as innovative paste (13%-16%)
- Nickel acetate salt with a nickel concentration of 23.5%
- Nickel acetate solution with a nickel concentration between 2.0% and 4.0%
- Nickel sulphamate solution with a nickel concentration between 10.0% and 12.0%
- Nickel phosphate solution with a nickel concentration between 8.8% and 10.3%
- Various other nickel salts and solutions can be designed individually according to customer requirements.
